

WHAT TO LOOK FOR IN A SOLAR INSTALLER

We encourage everyone to get at least two solar quotes with the confidence that SES ticks every box.

NABCEP CERTIFIED

Is your installer trained and tested to national standards for solar installation?

TOP ELECTRICAL EXPERTISE

Does your installer have Journeyman or Master level electrician expertise in-house and not sub-contracted?

ROOFING QUALIFIED

Does your installer use approved solar roofing products to protect against leaks for the next 25 years?

SOLAR FOCUSED CONSULTANTS

Is your solar consultant fully trained in the technical, electrical, design and regulatory aspects of solar?

ATTENTION TO DETAIL

Will your installer visit your home for a detailed review of shading, roof, electrical, and structural details?

ENGINEERING ACCURACY

Does your installer use specialized shade reading equipment to provide highly accurate production data and an in-house qualified engineer designing your system?

PERMITS, INSPECTIONS, CONNECTIONS

Will your installer handle all the complex utility, permitting, interconnection agreements, and inspections?

WARRANTY

Does your installer provide a warranty that is backed by their stability/longevity or a reputable 3rd party?

PROVEN TRACK RECORD

Does your installer have a deep history of successfully executing projects? Will they provide a list of reference to give you peace of mind that you are with a quality installer?
